ISHD: Statement on Russian invasion to Ukraine

The International Society for History Didactics (ISHD) strongly condemns Russia's war of aggression in violation of international law and expresses its full solidarity with the Ukrainian people. We support all who are working to end this war.

— ISHD was founded during the Cold War and has been committed to international dialogue and understanding in the field of History Didactics ever since. In light of the current violation of international law by a war that is bringing immeasurable suffering to the Ukrainian people and raising terrible fears in neighboring nations, the ISHD will adhere all the more to its mission of promoting international scholarly cooperation in the interest of dialogue and reconciliation. It will keep open the channels of scientific communication with all colleagues worldwide who share the ISHD's fundamental peace-building goals.

— Susanne Popp, President of the ISHD, on behalf of the Board
